Dear Peter,

Today I got a telephone call from Karl Richter, the physicist.

He told me the 2-Day School in Gsteig was very, very successful for him.

He now hits his Ball 50 meters longer and this with effortless power.

He never believed that he can reach this level in golf.

Understanding the alignments and doing them in the sequence helped him a lot.

His golf partners admired his progress, and they all know that this is the result of the school.

Kind regards,
Andy and Uschi
